

MYRTUE Harlan, Iowa MEDICAL CENTER

Scope: 3,500 SF
Product: Select 'Flat'
Finish: 2-Coat 70% PVDF
Color: Bone White & Slate Gray

PROJECT OVERVIEW

Myrtue Medical Center combines modern architectural design with patient-focused functionality to create a welcoming healthcare environment. Zeeff Panel Systems supplied approximately 3,500 square feet of Origin Select Flat panels in Bone White and Slate Gray 70% PVDF, providing a clean, contemporary façade that complements the building's masonry, glazing, and refined architectural detailing.

THE DESIGN CHALLENGE

The project required a durable exterior cladding solution that would seamlessly integrate with multiple building materials while reinforcing the healthcare facility's modern aesthetic. Clean panel alignment, subtle contrast, and long-term finish performance were essential to creating an exterior that inspires confidence and remains visually appealing for years to come.

OUR SOLUTION

Origin Select Flat panels delivered the flexibility needed to create crisp, monolithic wall surfaces with concealed fasteners and consistent reveals. The contrasting Bone White and Slate Gray finishes define key architectural elements throughout the building while providing exceptional weather resistance and long-term color retention through a premium 70% PVDF coating.
