

NBCE ASSESSMENT CENTER

Greeley,
Colorado

Scope: 1,700 SF
Product: Premier 'Flat'
Finish: 2-Coat 70% PVDF
Color: Iron Ore

PROJECT OVERVIEW

The NBCE Assessment Center was designed with a clean, contemporary façade that reflects the precision and professionalism of the organization it serves. To achieve the architect's vision, Zeeff Panel Systems supplied approximately 1,700 square feet of Origin Premier Flat panels finished in Iron Ore 70% PVDF, delivering a refined, monolithic appearance with long-term durability.

THE DESIGN CHALLENGE

The project required a façade system that emphasized simplicity without sacrificing visual impact. Crisp panel alignment, consistent reveals, and a durable finish were essential to creating a modern exterior that would maintain its appearance for years to come.

OUR SOLUTION

Origin Premier Flat panels provided the ideal balance of aesthetics and performance. The flat profile creates a smooth, uninterrupted surface while the concealed attachment system preserves clean architectural lines. Finished in Iron Ore, the façade complements the surrounding brick and expansive glazing, creating depth through contrast rather than excessive detailing.
