

OFFICES AT OVERLOOK

Kansas City,
Kansas

Scope: 17,500 SF
Product: Premier 'Edge'
Finish: Class I Anodized
Color: Clear Anodized

PROJECT OVERVIEW

The Offices at Overlook showcases a contemporary workplace defined by clean geometry, expansive glazing, and a refined architectural metal façade. Zeeff Panel Systems supplied approximately 17,500 square feet of Origin Premier Edge panels finished in Class I Clear Anodized, creating a sophisticated exterior with exceptional durability and timeless appeal.

THE DESIGN CHALLENGE

The design called for a façade system capable of delivering crisp architectural lines while complementing the building's expansive glass curtain wall. Maintaining visual consistency across large elevations, achieving precise panel alignment, and providing a finish that would retain its appearance over time were essential to the project's success.

OUR SOLUTION

Origin Premier Edge panels provided the depth and definition needed to elevate the building's architectural expression. The subtle profile creates shadow lines that add texture without overwhelming the design, while the concealed attachment system preserves clean, uninterrupted elevations. The Class I Clear Anodized finish introduces a refined metallic appearance with outstanding resistance to fading, corrosion, and weathering.
