

PAPILLION POLICE STATION

Papillion,
Nebraska

Product: Select 'Flat'

Finish: 2-Coat 70% PVDF

Color: Custom color match of "Nuance Green"

PROJECT OVERVIEW

The new Papillion Police Station was designed to project strength, professionalism, and longevity while integrating seamlessly with the surrounding civic architecture. Zeeff Panel Systems supplied Origin Select Flat panels finished in a custom "Nuance Green" 70% PVDF, providing a clean, contemporary façade that complements the building's distinctive curved form.

THE DESIGN CHALLENGE

The project featured a sweeping curved façade that demanded a panel system capable of maintaining consistent alignment and crisp detailing throughout the radius. The design team also required a custom finish that would enhance the building's civic identity while delivering exceptional durability in a demanding exterior environment.

OUR SOLUTION

Origin Select Flat panels provided the flexibility needed to accommodate the building's curved geometry without compromising the clean architectural aesthetic. Precision-fabricated standardized panels and a concealed attachment system create uninterrupted lines across the façade, while the custom-matched Nuance Green PVDF finish delivers long-term color retention and weather resistance.
