

REPUBLIC INTERMEDIATE SCHOOL

Republic,
Missouri

Scope: 10,060 SF

Product: Premier 'Flat'

Finish: 2-Coat Mica & 3-Coat 70% PVDF

Color: Custom Zinc Gray & Knockout Orange

PROJECT OVERVIEW

Designed to create a bold and welcoming learning environment, Republic Intermediate School features approximately 10,060 square feet of Origin Premier Flat panels in a custom combination of Zinc Gray and Knockout Orange. The contrasting finishes frame the building's primary entrances while adding energy, identity, and long-lasting performance to the façade.

REPUBLIC
INTERMEDIATE SCHOOL

THE DESIGN CHALLENGE

The design team sought a façade system that would establish a strong visual identity for the new school while withstanding the demands of a high-traffic educational environment. The building required a material that could deliver crisp architectural detailing, vibrant color retention, and lasting durability with minimal maintenance.

OUR SOLUTION

Origin Premier Flat panels provided the flexibility to create clean, geometric forms accented by bold color blocking. The concealed attachment system maintains uninterrupted architectural lines, while the custom PVDF finishes enhance the building's modern aesthetic and provide exceptional long-term weather resistance. The vibrant Knockout Orange serves as a visual focal point, complementing the neutral Zinc Gray panels to create a dynamic yet timeless exterior.
